## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, 7-14, 8-23, drawn to a projection optical system, comprising first diffractive optical element, a second diffractive optical element and an optical system arranged between the first and second diffractive optical elements classified in class 355, subclass 67.
  - II. Claims 4-6, 15-16, 22-28, drawn to a projection optical system having a optical element with a diffraction pattern surface form one surface and correction surface formed on the other surface, classified in class 359, subclass 569.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I-II have separate utilities such as increasing the resolution of the pattern images and correcting the manufacturing error of the diffraction pattern surface of the optical element. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2851

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
